

Chapter 3

Go Programming Secure Your Go Apps

PART TIME PROGRAM

Chapter 3 Go-lang Basics (GLNG)

Middleware & Best Practice API Implementation

+

Sesi 2

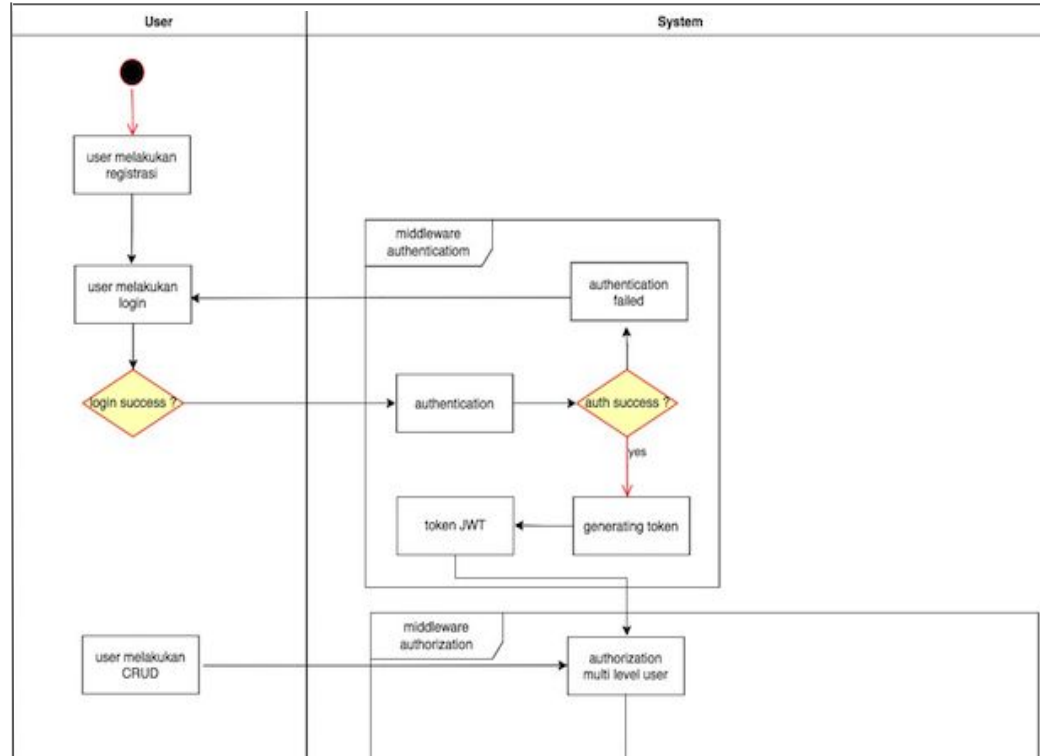

The background is a solid dark blue. It features several abstract geometric elements: a light blue triangle outline on the left, a dark blue circle outline in the top right, a light blue rectangle outline in the top right corner, a white circle outline in the bottom left, and a white arc in the bottom right. A thin white horizontal line is positioned above the word 'Challenge'.

Challenge

+

Membuat API dengan middleware authentication, authorization multi level user, dan authorization product by user id

Berikut Flow API dengan middleware yang harus dibuat :

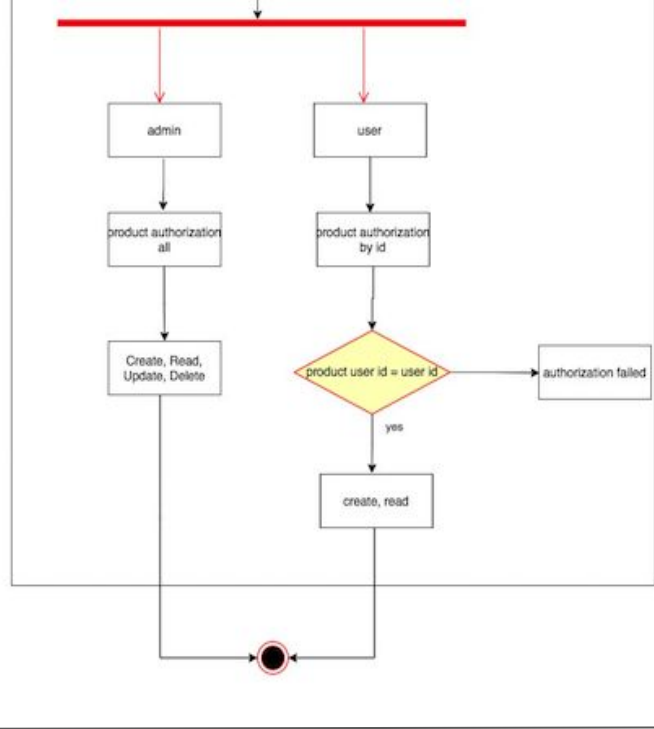

Detail Challenge :

Buatlah Rest API product (create, read, update, delete) dengan fitur login dan register, serta memiliki 3 fitur middleware antara lain :

- Authentication
- Authorization multi level user
- Authorization access product by id

Notes : buatlah authentication dengan JWT token golang, lalu gunakan token tersebut untuk setiap hit Rest API product.
